Professional Summary

Creative and results-driven **Frontend Developer with over 9+ years of experience** crafting impactful and user-centric designs in the web industry. Skilled in collaborating seamlessly with cross-functional teams to meet ambitious goals and tight deadlines. I seek to contribute to an organization that fosters innovation and supports continuous learning and career advancement. Always eager to stay updated with the latest design trends and technologies to create future-ready solutions. A strong advocate of clean code and pixel-perfect UI, I bridge the gap between design and development for seamless user experiences. Passionate about turning complex challenges into intuitive digital solutions that drive engagement and business results.

Skills

Technical: HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap, Tailwind, React, React Native, Adobe XD, Figma, Photoshop, Adobe Illustrator, Canva, Adobe Premiere Pro, Node JS (currently studying).

Productivity Tools - Git, Github, MS Office, MS Word, MS Excel, Power BI.

Soft Skills: Problem-solving, time management, teamwork, client communication.

Software Development -

Project: Gas Grid – Smart Gas Metering Platform

Role: UI/UX / Frontend Designer

Tech Stacks Used : HTML , CSS, JS, jQuery, Bootstrap, React, Material UI, Apex Charts, High Charts, AM Charts.

Description:

Gas Grid is a software-driven smart metering solution that seamlessly integrates with any meter type, network, and protocol, eliminating vendor lock-in and enabling true interoperability.

Responsibilities & Contributions:

- Spearheaded the UI/UX design for the Gas Grid platform, focusing on creating intuitive, responsive, and user-centric interfaces.
- Designed wireframes, user flows, and high-fidelity prototypes to simplify complex real-time data visualizations for energy administrators and field technicians.
- Conducted user research and usability testing to align the platform's functionality with user expectations and industry best practices.
- Collaborated with cross-functional teams including product managers, developers, and data analysts to ensure seamless integration of design with system logic.
- Applied design systems and accessibility standards to enhance usability across devices and user roles.

Project: Smart Energy Metering Platform

Role: UI/UX / Frontend Designer

Tech Stacks Used : HTML , CSS, JS, jQuery, Bootstrap, React, Material UI, Apex Charts, High Charts, AM Charts.

Description:

Gas Grid is a software-driven smart metering solution that seamlessly integrates with any meter type, network, and protocol, eliminating vendor lock-in and enabling true interoperability.

Responsibilities & Contributions:

- Spearheaded the UI/UX design for the Gas Grid platform, focusing on creating intuitive, responsive, and user-centric interfaces.
- Designed wireframes, user flows, and high-fidelity prototypes to simplify complex real-time data visualizations for energy administrators and field technicians.
- Conducted user research and usability testing to align the platform's functionality with user expectations and industry best practices.

- Applied design systems and accessibility standards to enhance usability across devices and user roles.

Project: Water Tank Monitoring System

Role: UI/UX / Frontend Designer

Tech Stacks Used : HTML , CSS, JS, jQuery, Bootstrap, Material UI, Apex Charts, High Charts, Fusion Charts.

Engineered a responsive web-based application to provide real-time monitoring and data visualization of water levels in storage tanks. The system is designed to facilitate efficient water management by providing actionable insights through a clean, intuitive, and performant user interface.

Responsibilities & Contributions:

- Led the complete frontend development lifecycle, from initial design concepts to final implementation. The interface was meticulously crafted using HTML, CSS, and JavaScript to deliver a seamless and engaging user experience.
- Integrated and configured multiple charting libraries, including Apex Charts, High charts, and Fusion Charts, to create dynamic and easy-to-interpret visualizations of water level data. This includes real-time levels, and predictive analytics.
- Architected a robust, responsive design using frameworks like Bootstrap and Material-UI, ensuring optimal viewing and interaction across a wide range of devices, including desktops, tablets, and mobile phones.
- Developed a sophisticated visual alerting system with color-coded indicators and animated elements to immediately notify users of critical conditions, such as low water levels or potential overflows. This feature is crucial for preventing waste and infrastructure damage.
- Focused on creating a highly performant and user-friendly application. Implemented techniques for performance optimization and conducted usability testing to refine the interface, resulting in a clean, logical, and efficient workflow for water management personnel.

Project: Stay X – One platform for rented accommodations

Role: UI/UX / Frontend Designer

Tech Stacks Used : Figma, HTML , CSS, JS, jQuery, Bootstrap, React.

Description:

As the UI Designer and Frontend Developer for Stay X, I was responsible for shaping a seamless digital experience for users seeking rented accommodations. My goal was to create an intuitive, visually appealing platform that simplifies the search, booking, and management of rental properties. I collaborated closely with stakeholders to understand user pain points and translated those insights into wireframes and high-fidelity prototypes using Figma.

Leveraging HTML, CSS, Bootstrap, and React, I developed responsive interfaces that ensure accessibility across devices. I focused on optimizing user flows, integrating real-time property listings, and implementing secure booking features. Throughout the project, I prioritized performance, accessibility, and scalability, ensuring the platform could grow with user demand. This project allowed me to blend creativity with technical expertise, resulting in a robust solution that streamlines the rental process for both property owners and tenants.

Professional Experience

Frontend Developer

Anand Techmasters Pvt Ltd

July 2025 - Present

- A seasoned professional in UI/UX design and frontend development, specializing in creating intuitive, user-centered dashboards and interfaces using a strong technical foundation in HTML5, CSS3, JavaScript, and React.
- Expertly manage the full project lifecycle from concept to on-time delivery, ensuring a cohesive and collaborative approach across design, development, and digital marketing teams.
- Drive business growth and client acquisition by leading strategic market research, proactive lead generation, and effective client engagement.
- Cultivate and maintain strong client relationships, presenting innovative solutions and negotiating contracts to ensure successful project outcomes and high client satisfaction.

Frontend Developer

Cloud4Things Technologies Pvt Ltd

March 2024 - June 2025

- Experienced in the design and development of user interfaces for a diverse range of dashboard projects, leveraging expertise in HTML5, CSS3, JavaScript, and React to build dynamic and responsive front-end applications.
- Proficient in using design tools like Adobe XD and Figma to create intuitive user experiences.
- Adept at independent project management, consistently delivering high-quality work within demanding deadlines.
- Skilled in cross-functional project coordination and collaboration, with a track record of supporting digital marketing initiatives to achieve project goals.

HTML Developer

Codeclouds IT Solutions Pvt Ltd

November 2018 - March 2024

- Worked as an HTML Developer, specializing in creating responsive and user-friendly web interfaces. Proficient in HTML5, CSS3, JavaScript, jQuery, Adobe XD, and Figma. Collaborated with an independent development team to deliver high-quality projects on time.

Key Responsibilities:

- Converted design files (PSD, Figma, Adobe XD) into clean, structured, and responsive HTML code.
- Designed user interface templates using Adobe XD and Figma, ensuring modern and intuitive layouts.
- Effectively balanced both independent and team-based problem-solving approaches to meet project goals.
- Maintained strong communication with clients by providing regular progress updates and timely information.
- Demonstrated strong organizational skills to manage priorities and consistently meet deadlines.
- Recognized for being punctual, reliable, and maintaining a positive, hardworking attitude in the workplace

Senior Web Designer

Onqanet Technologies Pvt Ltd

February 2016 - October 2018

- Started as a Junior Web Designer and was promoted to Senior Web Designer based on performance and skill development. Worked extensively on converting PSD templates into responsive HTML and implementing design changes using WordPress.

Key Responsibilities:

- Translated PSD design files into clean, responsive HTML/CSS code for web projects.
- Handled basic backend design tasks and content updates using WordPress and Magento.
- Designed branding assets including logos, business cards, flyers, and leaflets tailored to client needs.
- Created high-quality PSD templates aligned with modern design trends.
- Collaborated with the team to deliver client projects within tight deadlines while maintaining quality standards.
